

Memtrex* MP capsules

with polyethersulfone membrane

Figure 1: Memtrex MP Capsule Filters

description and use

Memtrex MP Capsule Filters (CMMP) offer unique polyethersulfone membranes that exhibit both high throughputs and precise retention characteristics for superior performance in most applications. Additionally, CMMP filters are resistant to a broad range of chemicals and pH extremes. The DI water rinsed CMMP filters are the filtration solution to a wide variety of applications in the beverage, pharmaceutical, and electronics industries.

typical applications

Memtrex MP Capsule Filters are specifically designed for filtration of process fluids in the beverage, pharmaceutical, and electronics industries, including applications such as filtration of:

- Acids, bases, and oxidants
- Serums and tissue culture media
- Pharmaceutical intermediates
- Fine inks and dyes
- Point-of-use for process water

additional information

Memtrex MP Capsule filters may be sanitized with a variety of commonly used chemical agents. The capsules may be repeatedly autoclaved (250°F [121°C], 30 minutes) for up to 5 cycles.

SUEZ certifies that the materials contained in its Memtrex MP Capsule filters meet U.S. FDA requirements for food contact under the applicable regulations in 21 CFR. For further information, contact SUEZ. Memtrex MP filters meet the test criteria for USP class VI-121°C Plastics.

Figures 2, 3, and 4 show the test data results of flow performance for the small, medium, and large Memtrex MP Capsule Filters using a 10-inch length filter.

SUEZ filter capsules are designed and manufactured for resistance to a wide range of chemical solutions. Conditions will vary with each application and users should carefully verify chemical compatibility.
